Boxwood Evergreens
Holly Trees Shrubs
Water Lilies Hardy Perennials

LANDSCAPE SERVICE

OUR AIM, AMBITION AND OBJECT

We are here to serve you in helping to develop the resources and beauties of Talbot County and the Eastern Shore.

The plants listed in this booklet are especially adapted for this locality, its soils and climate.

OUR ORGANIZATION AND EQUIPMENT

Our practical knowledge and long experience is our chief asset backed up by the youthful energy and enterprise of university graduates in Landscape Architecture and Floriculture, with a special knowledge of plant life on the Eastern Shore.

LOCATION

Situated about 2 miles out of Easton on the Dover Road Route 213, the main road between Easton. Salisbury and Cambridge.

DELIVERY

Delivery free within a radius of 10 miles of the nursery.

Complete landscape and planting service.

GUARANTEE

We will replace any plant that does not commence to grow when supplied and planted by us. Plants purchased from us and planted by the customer will be replaced at half-price, should failure ensue.

All terms, prices, conditions, etc., are subject to change wherein they conflict with the Nurserymen's Code under the N. R. A.

PRICE LIST

The following list, with few exceptions, may be planted in the fall, from September until the ground freezes.

Spring planting commences as soon as weather conditions permit.

ABELIA GRANDIFLORA (Glossy Abelia)	1.50
3 to 4 ft\$ ABIES CONCOLOR (Silver Fir)	1.50

The American Holly

Would you be interested in a holly hedge on your estate? It is hardly necessary to say what a beautiful picture it would be if properly located.

It has always been a mystery to us who are quite familiar with what the English have done with the holly in their gardens, why the American Holly has not come into its own in this country.

Just because it is rather difficult to transport from the woods is no proof that the Holly when nursery grown is not easily transplanted and a vigorous grower.

We do not wish to sell you a holly hedge unless it would be a success.

In approved positions and planted by us or under our supervision we guarantee success.

We should be glad to call and talk over the subject with you.

HARDY WATER LILIES

There is nothing more fascinating than Water Lilies in the garden. The smaller the garden the more desirable is the delightful feature of a pool even if it only be a half a barrel sunk in the ground.

It will be a spot of daily interest.

The needs of the Water Lilies are the same whether they are grown in a tub sunk in the ground, a concrete pool or a natural pond. Full sunshine, rich soil and warm shallow water.

Of course there are all kinds of Water Lilies. Tropical Water Lilies, both day and night blooming, that need special built tanks in greenhouses to keep them alive in the winter.

We, however, confine ourselves exclusively to those kinds that are hardy and that will grow as the wild pond Lilies.

Their colors range through all the reds and pinks, beautiful combinations of yellow, buff, orange and those glorious white ones that look as if they are carved out of wax.

It is most difficult to describe the colors for it is really the changing combinations which add so much to their charm.

From the time the lily pads or leaves come up out of the mud and float on the surface of the pool there is a constant change. Leaf after leaf develops until the plant gets strong enough, then will come a bud, which daily gets larger until it lifts itself well out of the water expanding in the early morning, closing about midday, opening again the following morning.

WATER LILIES

ATTRACTION:—A brief description is, garnet with tips of petals shaded a light rose. In rich soil the flowers lift themselves well out of the water and measure 8 inches across\$2.50
CHROMATELLA:—The best yellow water lily\$1.50 GLADSTONE:—The queen of white Water Lilies. Dazzling white large and strong grower, 6 to 8 inches across\$1.50
HOPATCONG:—An exquisite small white\$1.00 INDIANA:—A vivid combination of shades of copper,
and wine color\$1.50

JAMES BRYDON:—This variety was the general favorite of the many visitors to our Lily Ponds. The color is a rich rosy crimson, beautifully shaped, large flowers and rich foliage......\$3.00

PINK OPAL:—Rich pink, vigorous grower and produces an enormous quantity of flowers. A splendid kind for naturalizing in ponds......\$1.00

ROSE AREY:—Deep cerise pink, very delicate and lovely\$1.00

SIOUX:—The general effect is copper colored but the color constantly changes to all shades of apricot. An exquisite variety.....\$2.00

NELUMBO LUTEA, The American Lotus:—very much like the Japanese Lotus, but with large pale, lemon yellow flowers, equally as beautiful as the pink..\$5.00

HOW TO PLANT WATER LILIES

The plant you get is a tuber with one or more growing points. This should be planted or anchored in the mud where the water is not more than 6 or 8 inches deep.

If they are to be grown in a concrete pool plant in boxes or tubs not more than 12 inches deep and sink to the proper depth so that the surface of the soil will not be more than 8 inches under water.

HARDY PERENNIALS

We are growing a stock of Hardy Perennials and Biennials such as Coreopsis, Foxglove, Larkspurs, Iris, Peonies, Centaureas, Day Lilies, Hardy Lilies, Canterbury Bells, Pansies, etc.

Let us make you up a list for any given place or purpose.

With few exceptions they range in price from 5 cents to 25 cents each.

PLANTS WITH WATER ASSOCIATIONS

25 cents each; \$2.00 per 10 in any assortment.

DAFFODILS AND LILIES FOR NATURALIZING

After a long dreary winter, such as we had last year, there is nothing quite equal to the pleasure of going out on your grounds in the Spring and seeing a mass of golden daffodils nodding in the breeze. To enjoy this, you must plant them in the Fall.

The following kinds are the ones most suitable for naturalizing, so they they will become a permanent feature on your place. Vigorous growers that will increase. Low in price—so they may be planted in quantity, without too much outlay. All dependable sorts for the purpose:

EMPEROR—A superb daffodil, large yellow trumpet and primrose perianth\$6.00 per 100; \$50 per 1000

GOLDEN SPUR—The earliest to greet you in the Spring\$6.00 per 100; \$50 per 1000

SIR WATKIN—A bold handsome one. Its flower has a sulphur perianth and a sulphur cup tinged bright orange\$5.50 per 100; \$44 per 1000

RECURVUS—The old Pheasant's Eye Narcissus—white perianth with orange red cup.

\$3.00 per 100; \$25 per 1000

TRUMPET MAJOR—The old fashioned daffodil \$3.50 per 100; \$30 per 1000

HARDY LILIES

HEMEROCALLIS. The Gem. Rich deep orange yellow. Flowers in June......25c each; \$2.00 per 10

HEMEROCALLIS DUMORTEIRI. Dwarf golden yellow. The earliest to bloom...25c each; \$2.00 per 10

SPRAYS

An occasional spraying of your plants keeps them clean and healthy, even though they may not be bothered with any pest. Caterpillars, bugs and diseases are rarely serious unless you neglect them. These spray materials will take care of all the pests a small garden usually has and are simple and easy to use.

BRASS SPRAYER, continuous action, sturdy and reliable, two nozzles, quart size..........\$1.80 each GO-4. An arsenic spray for caterpillars, beetles and other chewing insects, with enough nicotine to kill most aphis, and copper to help keep your plants clean

Quantity Prices Subject to the NRA Code

of fungus. 1 lb. can makes 12½ gallons of spray \$1.00 GO PLANT SPRAY. A liquid oil spray with nicotine and pyrethrum, for red spider, aphis and scale.

1 Gallon can..... 2.50 each

BORDO MIXTURE POWDER. A 13 percent mixture for black spot and other fungus diseases.

1 lb. can.....\$.22

FERTILIZERS

To grow beautiful plants and to have a handsome garden, you must cultivate feed and water. The best plant food of all is rich, fine, well rotted cow manure, but that is difficult to get. These mixed fertilziers are excellent for the small flower garden, and are easy and clean to handle and with plenty of water give you fine growth.

PEAT MANURE: Contains manure, peat, bone meal and potash.

LANDSCAPE DEPARTMENT

Too frequently the home owner without sufficient funds to design completely his grounds wastes a good deal of money buying the wrong plants for certain locations. The better way is to locate all walks, drives, service and pleasure areas first, then plan the style and arrangement before planting a single plant.

Our organization is competent to design and plant your grounds in good taste. Keyed plans are made for extended plantings locating all features. Let us help you locate your walks and drives so that you won't suffer later the annoyance of misplaced service areas. In our planting arrangements we pay particular attention to the adaptability of the plants to their particular location.
